The IMAGERY ANALYSIS SERVICE NOTES is a periodic publication of the DDI Imagery Analysis Service, the departmental PI organization of CIA.

This publication highlights significant or timely intelligence items derived from photography.

The interpretations in this publication represent preliminary views which are subject to modification in the light of further information and more complete analysis.

## WARNING

This document contains information affecting the national security of the United States within the meaning of the espionage laws U. S. Code Title 18, Sections 793, 794. The law prohibits its transmission or the revelation of its contents in any manner to an unauthorized person, as well as its use in any manner prejudicial to the safety or interest of the United States or for the benefit of any foreign government to the detriment of the United States. It is to be seen only by personnel especially indoctrinated and authorized to receive information in the designated control channels. Its security must be maintained in accordance with regulations pertaining to TALENT-KEYHOLE Control System.

NORTH VIETNAM

Initial Repairs to the Thai Nguyen Iron and Steel Combine

The initial phases of cleanup and repair of North Vietnam's only iron and steel plant at Thai Nguyen were identified for the first time on photography of [REDACTED]. This plant suffered heavy bomb damage and has been inoperative since [REDACTED]

25X1D

25X1D

25X1D

Activity noted on the [REDACTED] coverage includes the repair of some rail spurs, construction of a new rail spur, ground scarring, and the filling of bomb craters. There is no evidence that repairs to the major production facilities have begun yet.
